The year 2016 gave me the conviction and confidence to notch up whatever I was doing. I'd organized a 50-hour marathon event on Ethical Hacking and Cyber Security in PSCMR College, Vijayawada that went on to bag to achieve Limca Book of Records for non-stop longest duration workshop. The impact we were making was clearly visible by now. Diverse people from Jammu & Kashmir in the North to Kanyakumari in the South had attended the event. Some of the Government of India officials took notice of this record and invited our team for couple of conferences at New Delhi. The country's esteemed institutions were reaching out to me to conduct training, workshops, and events on a myriad of subjects related to online security. Multi-National Corporations (MNC's) had begun to consult me on the Cyber Security of their systems.

PROJECT REPORT

PacketView Pro – Network Packet Sniffer Tool

1. Introduction

PacketView Pro is a professional network packet sniffer developed using Python. The tool captures real-time network traffic and displays packet details such as source IP, destination IP, protocol type, port numbers, and packet size. It also includes filtering, searching, and exporting capabilities. Additionally, a basic Intrusion Detection System (IDS) is implemented to identify suspicious activities such as sensitive port access and large packet transmissions.

With the increasing demand for cybersecurity, monitoring network traffic has become essential. Packet sniffing tools help analyze network behavior, detect anomalies, and improve security.

PacketView Pro is designed as a user-friendly GUI-based packet analyzer that allows users to monitor live traffic, filter packets, and detect potential threats.

2. Objectives

- To capture live network packets
- To analyze packet structure and protocols
- To implement filtering and searching mechanisms
- To detect suspicious network activity using IDS
- To export captured data for further analysis

3. Technologies Used

- **Python**
- **Tkinter** – GUI development
- **Scapy** – Packet capturing and analysis
